# OILS

From **1st August 2018** to **31st August 2018** we have a campaign on our oils, where you can grab a bargain at a fraction of their regular retail price.

Be sure to stick to the set intervals of changing oils. Then you have a very good foundation for strong and stable production in the woods. It is important not to mess with the oil quality. All of our ProSelect oils are optimized for our Komatsu machines.

They are of the right quality and contain all the necessary additives for the machine to function as intended. Also, be sure to follow the recommended intervals for oil filter changes. A clogged filter drains dirt that enables it to circulate back into the engine and cause damage. Replacing oil and filters is a negligible cost compared with what a motor renovation costs.
